

eC-LINK

Seamless Integration
Easy Modernization

We Bring The Best Together

eC-LINK Enterprise Software

A Compact & Contemporary ERP Solution

At eC-LINK, we understand your business needs an ERP solution which matches your business requirements today and can handle your future growth tomorrow.

eC-LINK Enterprise Software contains all the functionality which your enterprise needs, without being bloated by a system that is complicated and hard to use. Our solution allows information to flow seamlessly across departments, providing access to accurate and dynamic content to everyone. This modernization allows us to bring the best together with the automation of cross functional business processes associated with vendors, customer order and inventory, ensuring a streamlined purchasing process and reduced inventory.

It is the convergence of these factors which result in improved customer service and reduced operating expenses for your company, allowing you to leverage your assets and gain an advantage over your competitors.

The eC-LINK Advantage

Large Application Foundation

As can be seen from the figure below, the eC-LINK framework covers a wide range of features applicable to enterprise in various industries.

The object oriented design of our framework allows you to bring together the modules that fit your workflow best, thus ensuring your ERP system stays simple and is not plagued by the problems associated with an overly complex system burdened with redundant features.

Quick Customization, Rapid Implementation

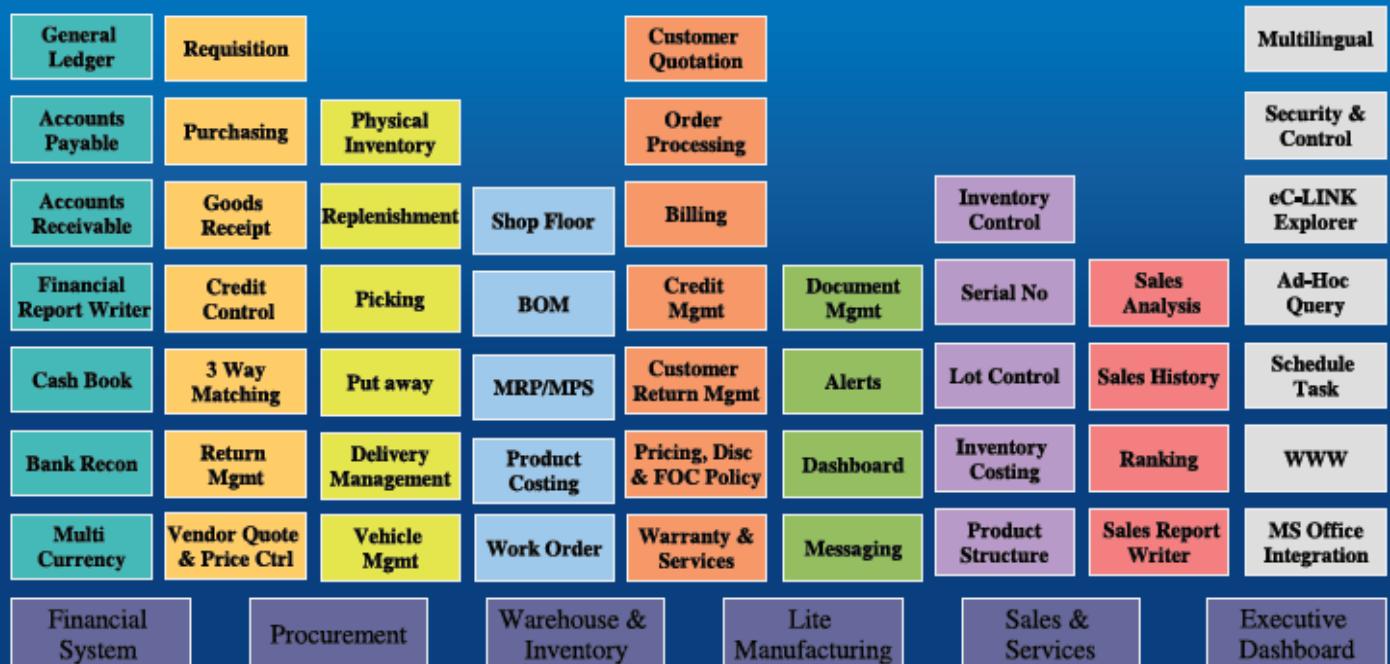

Due to the 100% modular design of our system and our in-house developed software engine, eC-LINK Enterprise Software is fast to implement and easily customized to align closely with your business' modernization path.

Our customers often see their customized eC-LINK solution "go live" in three months.

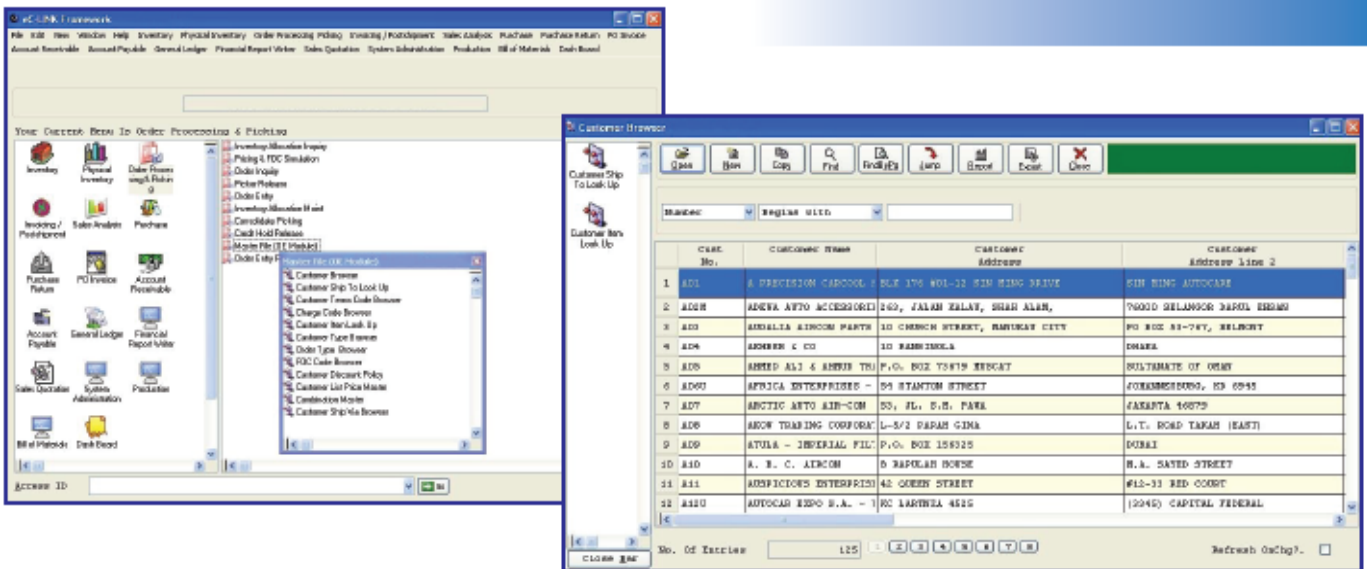

Scalability & Stability

eC-LINK Enterprise Software gives you the flexibility to choose between the Intel platform, the IBM iSeries, and the IBM xSeries.

The robustness of eC-LINK Enterprise Software ensure your needs will be met as your business continues to grow.

eC-LINK Application Foundation

Ease of Use

The screenshots above display the contemporary "Windows" - like design, as well as the friendly and graphical user interface of our product.

Multilingual Features

e-LINK Enterprise Software provides concurrent multilingual support in English and Chinese, allowing your business to print invoices and reports in either language.

Multimedia Integration

e-LINK Enterprise Software makes it easy for you to integrate multimedia with your ERP solution. The latest images can be added to an inventory information database and customer invoices can be scanned into our system for convenient accessibility.

In addition, e-LINK allows you to export data into popular file formats for portability and easy electronic exchange. For example, quotations can be exported to MS Excel spreadsheets, while purchase orders can be printed to PDF.

Knowledge and Expertise

With a team of dedicated staff and a history of developing and providing ERP systems since 1993, you can be assured that e-LINK has the experience and the know-how to tailor an enterprise system that brings out the best in your business.

Low Cost of Ownership

Our comparatively low total cost of ownership can be attributed to the modular design of our software, which makes changes more efficient and less costly.

e-LINK Enterprise Software also uses less processing power compared to our competitors; enabling e-LINK to run on less expensive entry-level servers.

"e-LINK provides us with flexibility, speed and accuracy. All information is available at our fingertips with a simple mouse click."

Jessie Ting, Financial Controller
Pely Auto Aircon Parts

"The customization and implementation of our enterprise software, the data conversion of several years of financial information, and the training of our staff was completed on-time within THREE months."

Juliette Lee, Executive Director
Tee Yih Jia Food Mfg Pte Ltd
